

Title of Your Paper in Title Case: Subtitle if Needed

Student Full Name

School of Computing, Wichita State University

CS 000: Course Name

Prof. Instructor Name

Month Day, Year

Abstract

Write a single paragraph of 150–250 words summarizing the purpose, method, key findings, and implications of your work. The abstract is not indented.

Keywords: keyword one, keyword two, keyword three

Title of Your Paper in Title Case: Subtitle if Needed

Start your introduction here. Every paragraph is indented 0.5 inches and the whole paper is double-spaced. You do not need to do anything to get this formatting; the template handles it.

When citing a source in parentheses, use \parencite: deep learning models have transformed computer vision (LeCun et al., 2015). When the author is part of the sentence, use \textcite: LeCun et al. (2015) reviewed the field. For two authors, APA uses “&” inside parentheses and “and” in the sentence: (Sutton & Barto, 2018) versus Sutton and Barto (2018). For three or more authors, APA shortens to “et al.” from the first citation: (Vaswani et al., 2017). Multiple sources in one parenthesis are ordered alphabetically: (LeCun et al., 2015; Vaswani et al., 2017). For a direct quotation, add a page number: (LeCun et al., 2015, p. 437).

Level 1 Heading: Centered, Bold, Title Case

Text begins as a new, indented paragraph below the heading.

Level 2 Heading: Flush Left, Bold, Title Case

Text begins as a new paragraph.

Level 3 Heading: Flush Left, Bold Italic, Title Case

Text begins as a new paragraph.

Level 4 Heading Indented, Bold, Title Case, Ending With a Period. Text begins on the same line and continues as a regular paragraph.

Level 5 Heading Indented, Bold Italic, Title Case, Ending With a Period. Text begins on the same line and continues as a regular paragraph.

Tables and Figures

Refer to every table and figure in the text, for example Table 1 and Figure 1. APA places the bold number above the italic title; the template does this for you.

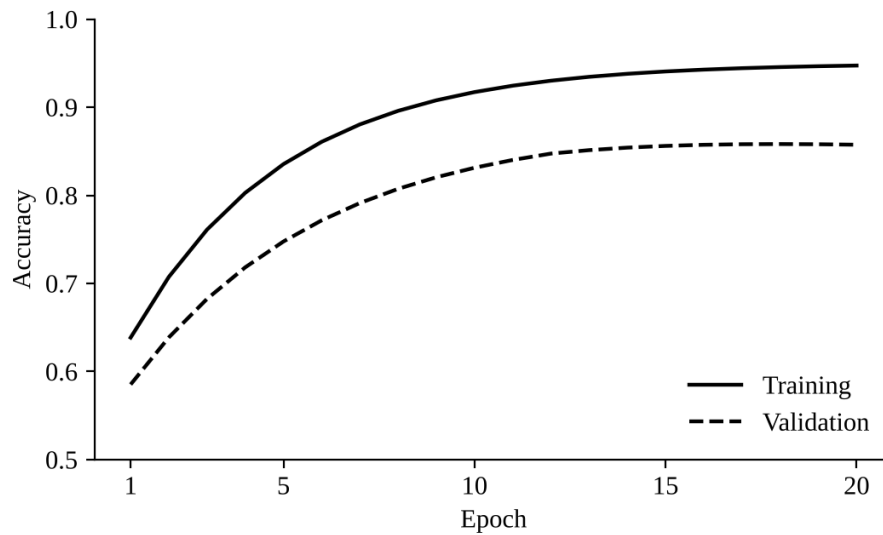

Equations are numbered on the right and can be referenced like tables, as in Equation 1:

$$F_1 = 2 \cdot \frac{\text{Precision} \cdot \text{Recall}}{\text{Precision} + \text{Recall}} \quad (1)$$

Table 1*Classification Performance of Each Model on the Test Set*

Model	Accuracy	Precision	Recall
Logistic regression	.82	.80	.79
Random forest	.87	.86	.85
CNN	.91	.90	.92

Note. Values are proportions. APA omits the leading zero for values that cannot exceed 1.

Figure 1*Training and Validation Accuracy Across 20 Epochs*

Note. Replace this figure with your own. Use the note to explain abbreviations or to credit the source of an adapted figure.

Conclusion

Summarize your main points here.
